

The Mark of Distinction in Forest Products SM

February 02, 2009

To Whom It May Concern:

Certification of participation of **T & D Machine Handling, Inc.** in the **Heat Treatment (HT)**-Wood Packaging Program of the ALSC (American Lumber Standard Committee), recognized by APHIS (Animal & Plant Health Inspection Service of the USA), using the services of **RRA** (Renewable Resource Associates, Inc.), in accordance with the international standard ISPM #15 (NIMF #15) published by the IPPC (International Plant Protection Convention of the FAO)

Renewable Resource Associates, Inc.(RRA) extends this certification of the qualification of **T & D Machine Handling, Inc.** in the “HT-Wood Packaging Program” of Renewable Resource Associates, Inc. (RRA), as a participating member in good standing.

T & D Machine Handling, Inc. qualified for participation in the RRA program on February 03, 2009. The program of RRA is monitored by the ALSC (American Lumber Standard Committee). The ALSC has a memorandum of understanding with the phytosanitary organization of the USA, known as APHIS, to certify and monitor wood packaging agencies that conduct monthly supervisory audits to ascertain compliance with the international Heat Treatment standard known as “ISPM #15 (International Standard for Phytosanitary Measures). That same document is known by its Spanish language title of “NIMF #15” (“Normas Internacionales para Medidas Fitosanitarias”).

RRA will perform (and/or is performing) monthly audits at the packaging facilities of **T & D Machine Handling, Inc.** to continually verify that solid wood packaging material and solid wood dunnage bearing the stamp RRA 3009, conform to ISPM #15 standard on an on-going basis. See the example stamp below.

Interested parties are welcome to inquire directly with the undersigned for more details about the program.

Respectfully,

Lon Sibert
President
RRA
